### Features and Benefits

- We are exclusive Distributor of DEUTZ Engine
- Half Century Experience in Generator Manufacturing
- Diesel Engines with Advanced Technology and Quality
- Alternators with Advanced Technology and Quality
- Control Panel Suitable for Flexible Application
- High Quality and Reliable Technology
- Patented Compact Designed and Soundproof Canopy
- Original DEUTZ AG Products
- Low Noise Level
- Low Exhaust Emission
- Low Operating Cost
- Low Fuel Consumption
- Low Oil Consumption
- Tropical 50°C Radiator
- Global DEUTZ AG Warranty
- Suitable for Heavy-Duty
- Durability
- Wide Range of Affordable Spare Parts
- Fuel Filter with Water and Particle Separator
- First Class Product Support
- Global Technical Service and Maintenance Support

| No of teeth on flywheel ring gear |     | 129                    |

##### Governor performance

|   |   |       |
|---|---|-------|
| Speed droop (static) mech. gov.               | % | 4-5   |
| Speed droop (static) electr. gov.(EMR/DDE)    | % | 0 - 3 |
| Governing standards to ISO 8528 Parts 1 and 5 |   | G2    |

##### Governor performance

|   |   |       |
|---|---|-------|
| Speed droop (static) mech. gov.               | % | 4-5   |
| Speed droop (static) electr. gov.(EMR/DDE)    | % | 0 - 3 |
| Governing standards to ISO 8528 Parts 1 and 5 |   | G2    |

##### Moment of inertia

|   |                   |        |
|---|-------------------|--------|
| Engine without flywheel                             | kg m <sup>2</sup> | 0,23   |
| Flywheel (standard genset spec.)                    | kg m <sup>2</sup> | 2,60   |
| Max. step load acceptance, 1st step                 | %                 | -      |
| Sound power at full load,incl. cooling system       | dB(A)             | 108,80 |
| Sound press.(1m average,full load), incl.cool.syst. | dB(A)             | 94,80  |

##### Moment of inertia

|   |                   |        |
|---|-------------------|--------|
| Engine without flywheel                             | kg m <sup>2</sup> | 0,23   |
| Flywheel (standard genset spec.)                    | kg m <sup>2</sup> | 2,60   |
| Max. step load acceptance, 1st step                 | %                 | -      |
| Sound power at full load,incl. cooling system       | dB(A)             | 113,10 |
| Sound press.(1m average,full load), incl.cool.syst. | dB(A)             | 99,10  |

##### Engine Weight

|                                |    |     |
|--------------------------------|----|-----|
| Engine dry, w/o cooling system | kg | 708 |
| Engine with cooling system     | kg | 785 |

##### Engine Weight

|                                |    |     |
|--------------------------------|----|-----|
| Engine dry, w/o cooling system | kg | 708 |
| Engine with cooling system     | kg | 785 |

##### Lubrication system

|  |     |               |
|--|-----|---------------|
| Oil specification                          |     | 15W40/CI-4/SL |
| Oil consumption (as % of fuel consumption) |     | 0,30          |
| Oil capacity (sump)                        | l   | 31            |
| Min. oil pressure (warning)                | bar | 2,70          |
| Min. oil pressure (shut down)              | bar | 2,00          |
| Max. permissible oil temperature(oil pan)  | °C  | 130           |

##### Lubrication system

|  |     |               |
|--|-----|---------------|
| Oil specification                          |     | 15W40/CI-4/SL |
| Oil consumption (as % of fuel consumption) |     | 0,30          |
| Oil capacity (sump)                        | l   | 31            |
| Min. oil pressure (warning)                | bar | 2,90          |
| Min. oil pressure (shut down)              | bar | 2,20          |
| Max. permissible oil temperature(oil pan)  | °C  | 130           |

##### Output

|                                    |     |        |
|------------------------------------|-----|--------|
| Gross output(LTP or StandBy Power) | kW  | 201    |
| Fan reduction                      | kW  | 7,20   |
| Net flywheel                       | kW  | 193,80 |
| Electrical output (Stand By)       | kVA | 250    |
| Gross output(PRIP or Prime Power)  | kW  | 183    |
| Gross output(Continous Power)      | kW  | 166    |

##### Output

|                                    |     |        |
|------------------------------------|-----|--------|
| Gross output(LTP or StandBy Power) | kW  | 224,9  |
| Fan reduction                      | kW  | 12,40  |
| Net flywheel                       | kW  | 212,50 |
| Electrical output (Stand By)       | kVA | 278    |
| Gross output(PRIP or Prime Power)  | kW  | 204    |
| Gross output(Continous Power)      | kW  | 186    |

### Other Details

#### Diesel Engine and Genset Rating Classifications

*The below ratings represent the engine performance capabilities to conditions specified in TS ISO 8528/1, 8528-4, 8528-5, 8528-8, BS5000, ISO 3046/1:1986, NEMA MG-1.22.1, BS 5514/1.*

#### STAND BY POWER RATING (ESP):

ESP is applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. Under no condition is an engine allowed to operate in parallel with the public utility at the Stand By Power rating. This rating should be applied where reliable utility power is available. A Stand By rated engine should be sized for a maximum of an 70% average load factor and 200 hours of operation per year. This includes less than 25 hours per year at the Stand By Power rating. Stand By ratings should never be applied except in true emergency power outages. Negotiated power outages contracted with a utility company are not considered an emergency.

#### PRIME POWER RATING (PRP):

Applicable for supplying electric power in lieu of commercially purchased power. Prime Power applications must be in the form of one of the following two categories:

#### UNLIMITED TIME RUNNING PRIME POWER (ULTP):

PRP (Prime Power) is available for an unlimited number of hours per year in a variable load application. Variable load should not exceed a 70% average of the Prime Power rating during any operating period of 250 hours. The total operating time at 100% Prime Power shall not exceed 500 hours per year. A 10% overload capability is available for a period of 1 hour within a 12-hour period of operation. Total operating time at the 10% overload power shall not exceed 25 hours per year.

#### LIMITED TIME RUNNING PRIME POWER (LTP):

LTP (Limited Time Prime Power) is available for a limited number of hours in a nonvariable load application. It is intended for use in situations where power outages are contracted, such as in utility power curtailment. Engines may be operated in parallel to the public utility up to 750 hours per year at power levels never to exceed the Prime Power rating. The customer should be aware, however, that the life of any engine will be reduced by this constant high load operation. Any operation exceeding 750 hours per year at the Prime Power rating should use the Continuous Power rating.

#### CONTINUOUS POWER RATING (COP):

COP is the power that the engine can continue to use under the prescribed speed and the specified environment condition in the normal maintenance period stipulated in the manufacturing plant. And Continuous Power is applicable for supplying utility power at a constant 100% load for an unlimited number of hours per year. No overload capability is available for this rating.

#### PAY ATTENTION to the points below in picking and using the generator

- \* Generators can work on Continuous Power at 70% of Prime power value if only all maintenances are done on time with original spare parts and high quality oils that manufacturer advice.
- \* Generators should not operate below 50% of Prime Power value. In such a case, the engine will burn excessive oil and eventually have irreparable damage.
- \* If your need is 1000 kVA or above, you should prefer Synchronic Systems with 2-3 generators with failure back up and simultaneous aging.
- \* These points will provide advantage for you with purchasing and operating the generator.

| Heater Tube Thermostat Control     | Working Hour   | Analog Modem                         | Selectable Protection Alarm / Shutdown |
| Battery Voltage                    | Oil Pressure   |                                      |  |

### Control Module Alerts

|                                 |                            |                        |                                |
|---------------------------------|----------------------------|------------------------|--------------------------------|
| Emergency Stop Malfunction      | Low Generator Voltage      | Low Water Temperature  | Charge Alternator Error        |
| High Generator Voltage          | High Generator Frequency   | Heat Sensor Broken     | Unbalanced Load                |
| Low Generator Frequency         | Phase Sequence Error       | Reverse Power          | Maintenance Time Alarm         |
| Low Load                        | Overload                   | Start Error            | Low Speed                      |
| Over Current                    | Low Water Level (Optional) | Stop Error             | High Speed                     |
| Unbalanced Current              | Low Oil Pressure           | Magnetic Pickup Error  | Broken Oil Sensor Cable        |
| High Oil Temperature (Optional) | High Battery Voltage       | High Water Temperature | Electronic Canbus Errors (ECU) |
| Low Fuel Level (Optional)       | Low Battery Voltage        |                        |                                |

### Sound Proof Canopy and Base Frame (Chassis) Specifications

|   |  |                                  |                                     |
|---|--|----------------------------------|-------------------------------------|
| Special, Registered GENPOWER Design and Color     | Robotic Painting with Electrostatic Powder Paint   | Temperature Tests                | Fuel Inlet and Return Records       |
| A1 Quality DKP / HRU /Galvanized Steel            | Drying and Stabilizing on 200°C Ovens              | Rustproof Accessories            | Impermeability Test for Fuel Tank   |
| Sensitive Twist on Automatic Press Brake          | 1500 Hour Salt Test                                | Cable Exit Connectors and Glands | Vacuumed Rubber Mounted             |
| Delicate Cut on Automatic Punch and Laser Bench   | Glasswool Isolation, A1 Class Material - 50/+500°C | Emergency Stop Button            | High Quality Weatherstrips          |
| Sensitive Welding on Robotic Welding Bench        | Special Covering Over Glass Wool                   | Fuel Level Gauge                 | High Quality Shock Absorbers        |
| Chemical Cleaning Nano Technology Before Painting | Best Sound Level (in dBA)                          | Fuel Drain Cap                   | Fuel Filling Cap (with ventilation) |
| Lifting and Carrying Equipments                   | External Exhaust Mufflers (Silencers)              | Daily Fuel Tank                  | External Fuel Tank                  |
| Internal Exhaust Mufflers (Silencers)             | Radiator Water Filling Cap                         |                                  |                                     |

### Special Products / Non - Standardized

|                              |                               |                                |                           |
|------------------------------|-------------------------------|--------------------------------|---------------------------|
| Synchronised Systems         | Generators - with Trailer     | DC Generators                  | High Frequency Generators |
| Scada Systems                | Medium Voltage - MV           | High Voltage - HV              | Variable Speed Generators |
| Mobile Systems               | IP44-IP54 Class Generators    | Power Plants                   | Super Silent Canopy       |
| Light Towers                 | Welding Machines              | Trigeneration Systems          | Cogeneration Systems      |
| Ground Power Unit Generators | Natural Gas Generator         | Biogas Generator               | LPG Generator             |
| Marine Generators            | Automatic Voltage Stabilizers | Electrical and Diesel Forklift | HFO Generator             |
| Dual Generators              |                               |                                |                           |

## SERIES

### Generator Dimensions

### Oil Recommendation and Oil Grades

| Values             |    | Open Type Generator | Canopy Type Generator |
|--------------------|----|---------------------|-----------------------|
| Width              | mm | 900                 | 1140                  |
| Length             | mm | 2400                | 3409                  |
| Height             | mm | 1840                | 1955                  |
| Weight (Net)       | Kg | 1554                | 1940                  |
| Fuel Tank Capacity | L  | 256                 | 445                   |

### Generator Technical Drawings

## Why You Should Buy GENPOWER?

### Only because it is the biggest generator factory in the World? NO!

- \* It is one of the most trustworthy and distinguished generator manufacturers in the world with its almost half century experience in the field.
- \* It has interiorized the strategy of **unconditional customer satisfaction** and has been working with this work ethic together with its whole crew.
- \* Customers and end users get their moneys' worth and more with every penny.
- \* It has become a big family with customers and users who receive durable, long-lasting and high quality products.
- \* It has been appreciated many times by customers and suppliers about the investments that have been made for quality enhancement.
- \* Both its suppliers and customers always know GENPOWER is and will always be there for them. GENPOWER on their side in bad and good days.
- \* In order not to harm brand reputation and recognition, each day, they work harder than the day before.
- \* It continues its business only with the suppliers, customers, dealers and technical services that also embrace the same mind set and work ethics.
- \* It proves its loyalty for quality and customer satisfaction with its mottos "**Your power is the core of our business**" and "**nothing will be left unfinished**".
- \* The specifications and/or modifications you can receive with extra costs by other manufacturers are included in standard production in GENPOWER
- \* When you purchase GENPOWER products, you are not a customer or a buyer but GENPOWER perceives and accepts you as a valuable member of its continuously growing family.

These are why you should buy from GENPOWER...
