GVP SERIES

GVP 275

GENPOWER GENERATOR

231/400V - 50Hz

Features and Benefits

- Half Century Experience in Generator Manufacturing
- Diesel Engines with Advanced Technology and Quality
- Alternators with Advanced Technology and Quality
- Control Panel Suitable for Flexible Application
- High Quality and Reliable Technology
- Patented Compact Designed and Soundproof Canopy
- Suitable for Heavy-Duty
- Durability
- Wide Range of Affordable Spare Parts
- Low Noise Level
- Low Exhaust Emission
- Low Operating Cost
- Low Fuel Consumption
- Low Oil Consumption
- Tropical 50°C Radiator
- Fuel Filter with Water and Particle Separator
- First Class Product Support
- Global Technical Service and Maintenance Support

Generator General Information

Generator	Frequency	Voltage	Power Factor	Speed	Diesel Engine		Alternator			Type of	Generator Output		
Model	Hz	V	CosQ	rpm	Brand	Model	Brand	Model	Series	Operation	kVA	kW	A

										Prime	250,0	200,0	361,3
										Continuous	175,0	140,0	252,9

VOLVO PENTA Diesel Engine Technical Parameters and Matching Parameters

Diesel Engine Main Technical Parameters

General		
Number of Cylinders		6
Configuration		Vertical, in line
Aspiration		Turbo Charged & CAC
Combustion System		Direct injection
Compression Ratio		17:1
Bore	mm	108
Stroke	mm	130
Displacement	L	7,15
Governing Type		Electronic
Governing Class		G3
Rotation		Counterclockwise
Firing Order		1-5-3-6-2-4
Emission		EU Stage 2
Filters		
Air Filter		Dry Type, replaceable
Fuel Filter		Element type, replaceable
Oil Filter		Element type, particulate trap
Electrical System		
Voltage	V	24
Starter	kW	5
Alternator Output Ampers	A	100
Alternator Output Voltage	V	28
Batteries Capacity	Ah	2X85
Fan		
Diameter	mm	870
Drive Ratio		1:1
Number of Blades		9
Material		Composite
Type		Blowing

Cooling System		
Radiator Type	50ºC	Tropical
Total Coolant Capacity	L	32
Max. Perm. Coolant Outlet Temperature	ºC	105
Max. Perm. Flow Resis. (Cool. System And Piping)	bar	0,5
Max.Temperature of Coolant Warning	ºC	98
Max. Temperature of Coolant Shutdown	ºC	103
Thermostat Operation Temperature - Initial Open	ºC	83
Thermostat Operation Temperature - Full Open	ºC	102
Delivery of Coolant Pump	m ³/ h	4,08
Min. Pressure Before Coolant Pump	bar	0,25
Radiator Face Area	m²	0,65
Rows	Row	2
Matrix Density	Per / Inch	12
Material		Aluminum
Width of Matrix	mm	745
Height of Matrix	mm	873
Pressure Cap Setting	kPa	90
Estimated Cooling Air Flow Reserve	kPa	0,125
Engine Pre Heater Tube (with Circulation Pump)	W	2000
Lubrication System		
Total System	L	29
Minimum Oil Level	L	20
Nominal Motor Operating Temperature	ºC	58
Lubricating Oil Pressure (Rated Speed)	bar	4,5
Relief Valve Opens	kPa	250
Oil / Fuel Consumption Ratio	%	0,03
Normal Oil Temperature	ºC	110

Diesel Engine Matching Parameters

50 Hz @ 1500 r/min		Stand By
Gross Engine Power	kW	250,0
Net Engine Power	kW	238,0
Fan Power Consumption (Belt Pulley Driven)	kW	11,6
Other Power Loss	kW	-
Mean Effective Pressure	MPa	2800,00
Intake Air Flow	m ³ / min	16,30
Exhaust Temperature Limit	ºC	550
Exhaust Flow	m ³ / min	33,40
Boost Pressure Ratio		26,00
Mean Piston Speed	m / s	6,5
Cooling Fan Air Flow	m ³ / min	240,0
Typical Generator Output Power	kVA	277

Heat Rejection		Stand By
Energy In Fuel (Heat Of Combustion)	kW	629,0
Gross Heat To Power	kW	250,0
Energy To Coolant And Lubricating Oil	kW	128,0
Energy To Exhaust	kW	177,0
Heat To Radiation	kW	26,0

Control Panel Specifications

Powder Painted Steel Pannel with Lockable Door	Battery Charger	Control Relays	System Protection MCBs
ATS (Automatic Transfer Panel) - Optional	Emergency Stop Button	Terminal Blocks	Circuit Breaker - Optional
Control Module	Backlit, 128x64 Pixels	Load Output Terminal	LCD Screen

Control Module Technical Parameters

Brand	GENPOWER	Model	Trans-MIDIAMF.232.GP
Dimensions	120mm x 94mm	Protection Class	IP65 From the Front
Weight	260 gr.	Environmental Conditions	2000 Meters Above Sea Level
Ambient Humidity	90% max.	Ambient Temperature	-20 ° C to + 70 ° C
DC Battery Supply Voltage	8 - 32 V	Battery Voltage Measurement	8 - 32 V
Network Frequency	5 - 99,9 Hz	Mains Voltage Measurement	3 - 300 V Phase-Neutral, 5 - 99.9 Hz
Generator Voltage Measurement	3 - 300 V	Generator Frequency	5 - 99.9 Hz
Current Transformer Secondary	5A	Working Period	Continuous
Charge Alternator Voltage Measurement	8 - 32 V	Charge Alternator Excitation	210mA & 12V, 105mA & 24V Nominal 2.5W
Communication Interface	RS-232	Analog Sender Measurement	0 - 1300ohm
Generator Contactor Relay Output	5A & 250V	Mains Contactor Relay Output	5A & 250V
Solenoid Transistor Outputs	1A with DC Supply	Start Transistor Outputs	1A with DC Supply
Configurable-3 Transistor Outputs	1A with DC Supply	Configurable-4 Transistor Outputs	1A with DC Supply

Control Module Functions

Mains Voltage Level Control	Generator Voltage Level Control	3 phase Generator Protections	3 phase AMF Function	Alarm Horn
Network Frequency Level Control	Generator Frequency Level Control	- High / Low Voltage	- High / Low Frequency	Heater Tube Thermostat Control
Engine Operating Option Control	Generator Current Level Control	- High / Low Frequency	- High / Low Voltage	Modbus and SNMP
Engine Stop Option Control	Generator Power Level Control	- Current / Voltage Asymmetry	- High / Low Water Temperature	Working Hour
Engine Speed (RPM) Level Control	Generator Work Schedule and Timing Control	- Overcurrent / Overload	- High / Low Load	Ground Leakage
Battery Voltage Options Control	Oil Pressure Controllers Control	Overheat Control	Mains, Generator ATS control	Analog Modem
Check Engine Maintenance Times	Configurable Analog Inputs and Outputs	1 Phase or 3 Phase, Phase Selection	Network, Voltage, Frequency Display	Ethernet, USB, RS232, RS485
Communication Interfaces GPRS, GSM	Keeping Error Records of Past Events	Parameter Setting via Control Module	Parameter Setting via Computer	Selectable Protection Alarm / Shutdown
Engine Speed	Configurable Programmable Digital Inputs and Outputs	Water Temperature	Hours of Operation	Battery Voltage
Voltage	Current and Frequency	Phase Sequence	Earting	Oil Pressure

Control Module Alerts

Emergency Stop Malfunction	Low Generator Voltage	Low Water Temperature	Charge Alternator Error	High Oil Temperature (Optional)
High Generator Voltage	High Generator Frequency	Heat Sensor Broken	Unbalanced Load	Low Fuel Level (Optional)
Low Generator Frequency	Phase Sequence Error	Reverse Power	Maintenance Time Alarm	High Battery Voltage
Low Load	Overload	Start Error	Low Speed	Low Battery Voltage
Over Current	Low Water Level (Optional)	Stop Error	High Speed	High Water Temperature
Unbalanced Current	Low Oil Pressure	Magnetic Pickup Error	Broken Oil Sensor Cable	Electronic Canbus Errors (ECU)

Sound Proof Canopy and Base Frame (Chassis) Specifications

Special, Registered GENPOWER Design and Color	Robotic Painting with Electrostatic Powder Paint	Temperature Tests	Fuel Inlet and Return Records	Lifting and Carrying Equipments
A1 Quality DKP / HRU /Galvanized Steel	Drying and Stabilizing on 200°C Ovens	Rustproof Accessories	Impermeability Test for Fuel Tank	Internal Exhaust Mufflers (Silencers)
Sensitive Twist on Automatic Press Brake	1500 Hour Salt Test	Cable Exit Connectors and Glands	Vacummed Rubber Mounted	External Exhaust Mufflers (Silencers)
Delicate Cut on Automatic Punch and Laser Bench	Glasswool Isolation, A1 Class Material -50/+500°C	Emergency Stop Button	High Quality Weatherstrips	Radiator Water Filling Cap
Sensitive Welding on Robotic Welding Bench	Special Covering Over Glass Wool	Fuel Level Gauge	High Quality Shock Absorbers	Daily Fuel Tank
Chemical Cleaning Nano Technology Before Painting	Best Sound Level (in dBA)	Fuel Drain Cap	Fuel Filling Cap (with ventilation)	External Fuel Tank

Special Products / Non - Standardized

Synchronised Systems	Generators - with Trailer	DC Generators	High Frequency Generators	Marine Generators
Scada Systems	Medium Voltage - MV	High Voltage - HV	Variable Speed Generators	Dual Generators
Mobile Systems	IP44-IP54 Class Generators	Power Plants	Super Silent Canopy	Automatic Voltage Stabilizers
Light Towers	Welding Machines	Trigeneration Systems	Cogeneration Systems	Electrical and Diesel Forklift
Ground Power Unit Generators	Natural Gas Generator	Biogas Generator	LPG Generator	HFO Generator

Diesel Engine and Genset Rating Classifications

The below ratings represent the engine performance capabilities to conditions specified in TS ISO 8528/1, 8528-4, 8528-5, 8528-8, BS5000, ISO 3046/1:1986, NEMA MG-1.22.1, BS 5514/1.

STAND BY POWER RATING (ESP):

ESP is applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. Under no condition is an engine allowed to operate in parallel with the public utility at the Stand By Power rating. This rating should be applied where reliable utility power is available. A Stand By rated engine should be sized for a maximum of an 70% average load factor and 200 hours of operation per year. This includes less than 25 hours per year at the Stand By Power rating. Stand By ratings should never be applied except in true emergency power outages. Negotiated power outages contracted with a utility company are not considered an emergency.

PRIME POWER RATING (PRP):

Applicable for supplying electric power in lieu of commercially purchased power. Prime Power applications must be in the form of one of the following two categories:

UNLIMITED TIME RUNNING PRIME POWER (ULTP):

PRP (Prime Power) is available for an unlimited number of hours per year in a variable load application. Variable load should not exceed a 70% average of the Prime Power rating during any operating period of 250 hours. The total operating time at 100% Prime Power shall not exceed 500 hours per year. A 10% overload capability is available for a period of 1 hour within a 12-hour period of operation. Total operating time at the 10% overload power shall not exceed 25 hours per year.

LIMITED TIME RUNNING PRIME POWER (LTP):

LTP (Limited Time Prime Power) is available for a limited number of hours in a nonvariable load application. It is intended for use in situations where power outages are contracted, such as in utility power curtailment. Engines may be operated in parallel to the public utility up to 750 hours per year at power levels never to exceed the Prime Power rating. The customer should be aware, however, that the life of any engine will be reduced by this constant high load operation. Any operation exceeding 750 hours per year at the Prime Power rating should use the Continuous Power rating.

CONTINUOUS POWER RATING (COP):

COP is the power that the engine can continue to use under the prescribed speed and the specified environment condition in the normal maintenance period stipulated in the manufacturing plant. And Continuous Power is applicable for supplying utility power at a constant 100% load for an unlimited number of hours per year. No overload capability is available for this rating.

PAY ATTENTION to the points below in picking and using the generator

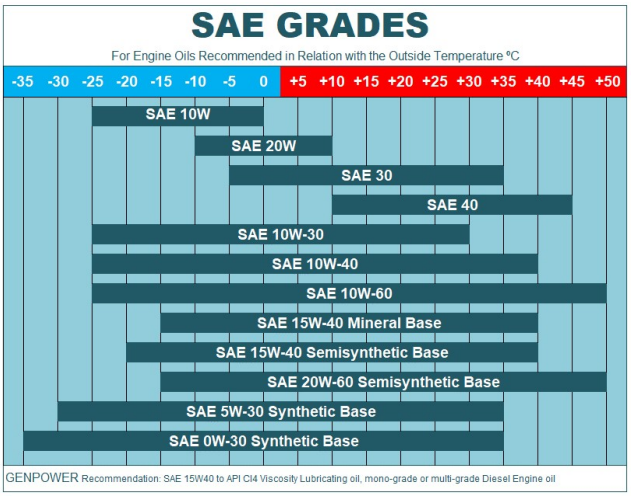
* Generators can work on Continuous Power at 70% of Prime power value if only all maintenances are done on time with original spare parts and high quality oils that manufacturer advice.
* Generators should not operate below 50% of Prime Power value. In such a case, the engine will burn excessive oil and eventually have irreparable damage.
* If your need is 1000 kVA or above, you should prefer Synchronic Systems with 2-3 generators with failure back up and simultaneous aging.
* These points will provide advantage for you with purchasing and operating the generator.

Fuel Consumption - Oil Recommendation and Oil Grades

Fuel Consumption	
Percent of Prime power	l/hr
110%	60,2
100%	54,0
75%	43,0
50%	30,8

Note:The density of diesel is 0.835 kg/L

Fuel specification: BS 2869: Part 2 1998 Class A2 or (DIN EN 590) ASTM D975 D2 Diesel. The fuel must be clean and without water)



Why You Should Buy GENPOWER?

Only because it is the biggest generator factory in the World? NO!

* It is one of the most trustworthy and distinguished generator manufacturers in the world with its almost half century experience in the field.
* It has interiorized the strategy of **unconditional customer satisfaction** and has been working with this work ethic together with its whole crew.
* Customers and end users get their moneys' worth and more with every penny.
* It has become a big family with customers and users who receive durable, long-lasting and high quality products.
* It has been appreciated many times by customers and suppliers about the investments that have been made for quality enhancement.
* Both its suppliers and customers always know GENPOWER is and will always be there for them. GENPOWER on their side in bad and good days.
* In order not to harm brand reputation and recognition, each day, they work harder than the day before.
* It continues its business only with the suppliers, customers, dealers and technical services that also embrace the same mind set and work ethics.
* It proves its loyalty for quality and customer satisfaction with its mottos "**Your power is the core of our business**" and "**nothing will be left unfinished**"
* The specifications and/or modifications you can receive with extra costs by other manufacturers are included in standard production in GENPOWER
* When you purchase GENPOWER products, you are not a customer or a buyer but GENPOWER perceives and accepts you as a valuable member of its continuously growing family.

These are why you should buy from GENPOWER…
